RugShield AI - Whitepaper

Introduction

RugShield AI is a next-gen security layer built for the Solana memecoin ecosystem, designed to protect traders on platforms like Pump.fun. Powered by AI, it provides real-time analysis, scoring, and monitoring of token smart contracts, LP status, developer wallet activity, and more.

Problem & Solution

Solana traders face thousands of rug pulls daily due to unverified and risky token contracts. RugShield AI solves this with its RugScore(TM) engine, LP lock checker, and spoofed whale activity detection. It empowers traders to verify and assess risks before entering positions.

RugScore(TM) Engine

RugScore(TM) is an AI-based scoring model ranging from 0 to 100. It evaluates smart contract patterns, wallet behavior, LP events, and price anomalies to deliver a real-time rug probability score.

Features

- Real-Time Rug Detection
- LP Lock & Unlock Alerts
- Dev Wallet Tracker
- Whale Spoof Detection
- Chrome Extension Integration
- AI Sentiment Prediction (upcoming)

$RGAI Token Utility

The $RGAI token unlocks full access to RugShield's premium detection features, historical dashboards, early alerts, and upcoming DAO governance. Holding $RGAI will also qualify users for airdrops and premium tiers.

RugShield AI - Whitepaper

Chrome Extension

Users can install the RugShield AI Chrome extension to monitor tokens live on Pump.fun. The extension overlays RugScore(TM), LP status, and flagged dev wallets directly onto token pages for instant decision-making.

Roadmap

Q2 2025: Launch Chrome Extension & Website

Q2 2025: Public Token Launch on Pump.fun ($RGAI)

Q3 2025: DAO Governance System + Telegram Bot Alerts

Q4 2025: Integrate with Raydium + Additional AI Features
